K-kiosk Partnership Information

Use diverse benefits K-kiosk provides for your business success.

We are sharing the business with several partners. We want to grow and develop with passionate partners in the field of technical partnership, design, plan, manufacturing, and sale. You will soon discover how we can help you with streamlining operation, expanding sale, and practicing the skill for you to enter into high-growth field.

K-KIOSK Overseas Export

KORYO KIOSK is famous for its brand, K-KIOSK abroad. With its vision to produce the world class KIOSK, we secured 8 resellers across the continents in 2016 and built storage warehouses. We aim to realize sustainable growth through inland transit of our products to overseas clients, and hope that K-KIOSK shall be able to contribute in enhancing the status of our country in the world.

Are you looking for the world class design and innovative technology of KIOSK?

K-KIOSK is a firm that offers general services regarding the KIOSK System, from design and manufacture of external cases to development of KIOSK contents and solutions. We endeavor to satisfy clients' requirements on our products and services as IT environment is changing rapidly.

▲ The corporate lab of K-KIOSK promotes new ideas for innovation and next-generation technical development, encouraging long-term leadership of our firm.

We offer you an opportunity to experience a wide range of products and manufacturing technologies at the KIOSK show room.

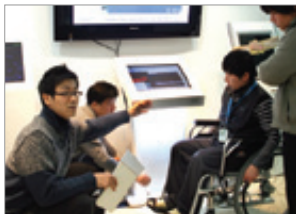

K-KIOSK has a SHOW ROOM that enables users to directly experience and view the simulation of our products, offering a pre-design/product development method to KIOSK users. The conventional way of purchasing products through a website has been supplemented, which provides show room visitors with an upgraded service.

▲ Show Room

Technology surpasses our dream...
Towards the value of challenge & innovation!! We,
K-KIOSK, are here with you to make it come true.

K-KIOSK obtained international standard certificates that meet the overall requirements of quality and environmental control system on design/manufacturing of KIOSK and touch screens and development of web programs from the ICR (International Certification Registrar)
ISO9001/14001 - Quality & Environmental Control System

K-KIOSK ADA Compliant

The Korean Anti-Discrimination and Remedies for Persons with Disabilities Act (Partially Amended: 2010.05.11 No. 10280) When adopting and installing the KIOSK System at public institutions and companies in Korea, the following laws and regulations must be complied with.

We, K-KIOSK, conform to the American ADA as well as the Korean Anti-Discrimination and Remedies for Persons with Disability Act. Considering the case in which wheelchairs are placed near the KIOSK, it shall meet the ADA guideline on ATM range and maximum height.

Metal keyboard

If a client wishes to install a keyboard, K-KIOSK shall in principle install a metal keyboard. Any public and industrial PCs and factory-made KIOSK shall be easily installed, and it is composed of a trackball and a touchpad type.

As it is made of stainless steel materials, it is highly sophisticated in terms of its texture and visual appearance. It is also resistant to water, dust and destruction, and since its surface is smooth it is easy to remove any pollutants with a wet cloth. Moreover, a keyboard life test was conducted to improve durability as it may be operable for a long period time.

K-KIOSK Overseas Export

KORYO KIOSK is famous for its brand, K-KIOSK abroad. With its vision to produce the world class KIOSK, we secured 8 resellers across the continents in 2016 and built storage warehouses. We aim to realize sustainable growth through inland transit of our products to overseas clients, and hope that K-KIOSK shall be able to contribute in enhancing the status of our country in the world.

33 A/S centers under operation in 27 cities throughout the country

We quickly solve any failures that may occur during the operation at our Service Centers.

We classify the failures into detailed categories by class to adopt varying procedures, which allows us to realize efficient, prompt responses to failures, satisfying our clients. Our professional maintenance team applies its best know-how in the relevant field to minimize the failures as much as possible. Regular inspection and maintenance are carried out along with thorough services to maximize work-efficiency and to reduce inefficiency regarding the task given, ultimately to prevent any failures that may be generated as clients use the KIOSK System.

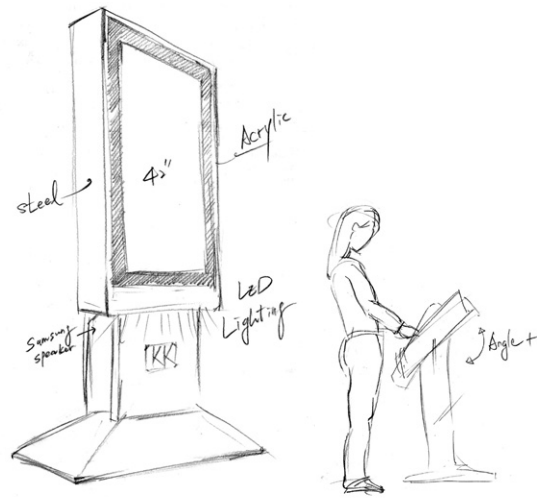

KIOSK Peripheral Devices Testing Service

A Testing Center is located inside the show room of our HQ so that developer's intention can be more accurately and quickly reflected to the critical projects implemented by client(s), allowing such client(s) to simulate and manipulate the devices inside the center. Reservation is required for the service. Please check the device information beforehand.

Do you need a specially-designed KIOSK with the minimum development cost? We offer you with a scientific process.

K-KIOSK prevents non-productive COPQ (Cost of Poor Quality) at the product design/development stage, reduces any waste of time, cost and materials, improves trial-and-error and proposes an objective and scientific process in decision-making after the design concept is deducted, which is the most significant design actualization stage among the design process stages. We offer you with a sustainable, yet creative design process by measuring and verifying the validity and performance improvement against the conventional processes.

• Cost of Poor Quality!!

Any additional cost arising from low product quality, in other words, any hidden cost owing to an unexpected event at the KIOSK development stage shall be revealed.

Proposition of the KIOSK DESIGN Process

K-KIOSK MODEL

MODEL **K24S**

This model is a slimmer design of the previous KS24 model, which is redesigned and manufactured to be installable at a very limited space. In particular, it is made of a standardized 1.6mm CR-steel material and powder-coated to improve its durability. It is an independent type KIOSK model that stands out for its elegance and sophistication. This product is able to mount a 19" touch monitor, and its inner is designed to be able to be installed with a bare born PC and slim PC. In addition, the inner is also expanded to install various types of devices including a thermal printer, a RF reader, a barcode scanner and a MCR.

► 19" Size : 530(W)mm X 360(D)mm X 1768(H)mm

MODEL **K15**

K15 model is a KIOSK terminal manufactured with a 1.6mm CR-steel material and liquid-coated that shows excellent gloss. It has a space to install a slim PC as well. K15 is equipped with an innovative metal cabinet closure, and it is designed to add dignity as stainless steel side poles are installed. Other optional devices can be selected by users, upgrading the model.

► 19" Size : 470(W)mm X 550(D)mm X 1550(H)mm

MODEL **K17**

K17 model is a KIOSK terminal manufactured with a 1.6mm CR-steel material and liquid-coated that shows excellent gloss. It has a space to install a micro-ATX PC. K17 is famous for its innovative metal cabinet closure, and other optional devices can be selected by users, further upgrading the model.

► 19" Size : 530(W)mm X 375(D)mm X 1530(H)mm

MODEL KS25

KS25 model is a slim-designed, independent-type KIOSK model that is made of a standardized 1.6mm CR-steel material and powder-coated to improve its durability, making it more sophisticated and elegant.

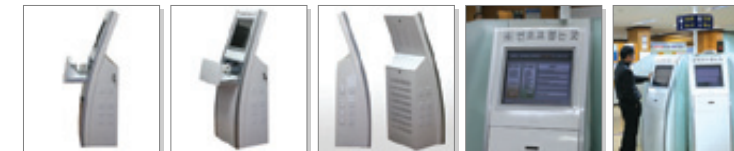

► 19" Size : 570(W)mm X 460(D)mm X 1400(H)mm

MODEL K27

K27 model is a KIOSK terminal manufactured with a 1.6mm CR-steel material and liquid-coated that shows excellent gloss. It has a space to install a micro-ATX PC. K27 is famous for its innovative metal cabinet closure, and other optional devices can be selected by users, further upgrading the model.

► 19" Size : 530(W)mm X 380(D)mm X 1450(H)mm

MODEL KW19

KW 19 model is designed by taking an ATM machine as a motive which is easily accessible every day, and it is relatively smaller in size for it is 1480mm in height, manufactured to be useful to a wide range of users. Its Bottom Panel is designed to be as flat as possible for the convenience and movement of users.

► 19" Size : 640(W)mm X 790(D)mm X 1633(H)mm

MODEL KY22

K22 is an advanced model made of a standardized 1.6mm CR-steel material, and liquid coated. It is designed to be noticeable as it stands out and is more aesthetic for it is attached with a LED lamp and acryl accessories at the front part. Depending on the client's requirements, a LED touch panel ranging from 22" to 42" can be installed, and the inner is designed to allow installation of a slim PC requested by the client. This model can also be purchased with immediacy.

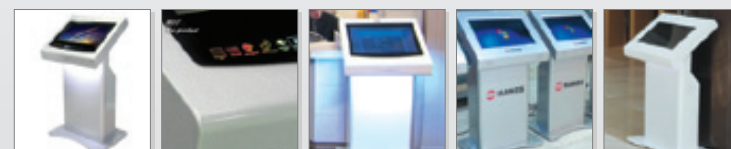

► 21.5" Size : 560(W)mm X 570(D)mm X 1620(H)mm

MODEL K22 / BP

K22 is an advanced model made of a standardized 1.6mm CR-steel material, and liquid coated. It is designed to be noticeable as it stands out and is more aesthetic for it is attached with a LED lamp and acryl accessories at the front part. Depending on the client's requirements, a LED touch panel ranging from 22" to 42" can be installed, and the inner is designed to allow installation of a slim PC requested by the client. This model can also be purchased with immediacy.

► 19" Size : 630(W)mm X 450(D)mm X 1790(H)mm

MODEL KL57

KL 57 model is designed and manufactured to be used under a wide range of conditions, which is made of a 1.6mm CR-steel and liquid-coated. Furthermore, there is a space inside the model to install a slim, industrial or bare bone PC.

► 19" Size : 520(W)mm X 430(D)mm X 1360(H)mm

MODEL KC17

K17C model is a KIOSK terminal made of a 1.6mm CR-steel and is powder-coated to improve its durability, equipped with a space to install a slim PC. K17C is characterized for its profound taste added to the design as molded side poles are installed, and an optional LED lamp is attached to the lower section so that it can be used depending on its installation location. It is further upgraded since various optional devices can be selected unlike the previous K17 model.

▶ 19" Size : 600(W)mm X 500(D)mm X 1648(H)mm

MODEL KW14

KW14 model is designed to meet the usability aspect, and it is used for installation of heavy devices including a passport reader and printer devices. A shelf-type Front Panel is adopted so that such devices can be used conveniently. Moreover, a space to apply a title phrase at the upper section is secured so that users have no difficulty in identifying the purpose of a cabinet. This model is also suitable for installing devices that require an angle of view like a webcam.

▶ 19" Size : 580(W)mm X 440(D)mm X 1720(H)mm

MODEL KRT-70

KRT-70 model can be placed on a shelf, a table or a desk, which can be applied as various types of KIOSK including the Factory Automation System, the Business Automation System or POS System. Basically, it is made of a 1.6T CR-steel and equipped with a space to mount a wide range of devices such as a barcode scanner, a card reader and RFID. Especially, it is installed with a sliding door to insert a mouse, making it a convenient business system.

▶ 19" Size : 560(W)mm X 398(D)mm X 920(H)mm

MODEL K-iPad

The K-iPad model is K-Kiosk's latest model in 2013 made using Apple's iPad. This model allows users to use a simple yet intuitive interface using iOS6, the most advanced mobile operating system in the world. It is available for all applications to be operated on iOS, and is all-purpose model that can be ready for various uses, such as order issuance and ticketing, through the installation of devices, including RFID and thermal printer.

▶ iPad2 Size : 643(W)mm X 380(D)mm X 1200(H)mm

MODEL KRI 75·77 Industrial KIOSK

It is a simple yet stable product designed and manufactured for the factory automation system. KRI 75 model is designed/manufactured to be water/dust-proof conforming to the IP45 standards, in order to maintain system stability under any factory conditions. Casters are fixed to the model so that it is easily movable for installation and a space big enough to install various devices including the AVR, SMPS and UPS are secured. Also, a drawer-type sliding door is installed to place a keyboard and a mouse.

▶ KRI 75 19" Size : 560(W)mm X 450(D)mm X 1700(H)mm

▶ KRI 77 19" Size : 550(W)mm X 422(D)mm X 1603(H)mm

MODEL KJ24

The KJ24 model is an extension kiosk in which a monitor and a mouse are integrated. This is an alternative to an input method that the existing touch screen alone is insufficient, but also it shows a very appropriate match with housing. Its 24-inch vertical monitor can share more information and can be used for government offices and other work with security film attached at the request of customers.

▶ 24" Size : 520(W)mm X 430(D)mm X 1360(H)mm

MODEL K24SPR

This model is an extension type model of the K24S model. K24SPR has evolved in the form of the number ticket dispenser and allows for the mounting of a bar code reader, a card reader, and an A4 laser printers, thus making it a model suitable for solutions at hospitals, universities, etc. It is an opening and closing type on its front, and is the model that has the convenience of maintenance and repair, including replacement of paper, and that can mount various devices.

▶ 19" Size : 530(W)mm X 591(D)mm X 1711(H)mm

2014 New Model

MODEL

PKD

The PKD model is the 21.5" dual monitor, and can have the advertisement effect through company advertising image at its top and is equipped with IR touch at its lower. It also allows for ticketing and card payment after searching for existing members. The model has devices such as card reader, bar code reader, and thermal printer (receipt) installed and is a kiosk that can use in a customized manner depending on the intended use.

▶ 21.5" Size : 670(W)mm X 570(D)mm X 1966(H)mm

MODEL KYC-1000

This is a multipurpose unmanned ticket-issuing machine with which a camera, a card reader, an RFID, a bar code scanner, ticketing printer, receipt printer, etc. This machine is equipped with a large, bright monitor of 46 inches on the front, and makes it possible to maximize the promotional effectiveness by showing bigger event screens in the standby screen. The overall design not only is profound but also gives ideal stability by placing white on the front and treating the flow leading to the rear side of the body with black in color. It is optimized as a paid unmanned ticket-issuing machine for theaters, parks, etc.

▶ 42" Size : 1002(W)mm X 791(D)mm X 2084(H)mm

MODEL DUAL Type

It is a two-way KIOSK terminal made of CR-steel, giving a strong impression. Dual monitors are installed. The basic one is used for two-way media and the other optional one is used for advertisement. As an option, a space to install a compact PC or a media player can be determined by users. This is a modern, dual-monitor KIOSK with the second portrait monitor with its image ratio of 16:9.

Monitor -Dual

▶ Monitor product size is determined according to the specifications

MODEL ZEUS

Zeus model was developed as rental purpose DID products with 42" LED Display and it's Slim design is for using a variety of customer's advertising on bottom. And it is also possible to replace a advertising at the bottom. The model has been designed to allow easy install side shelves that is for placing various catalogs on left and right side of the cabinet and Zeus can be used many exhibition and event which need digital sign and catalogue holder.

▶ 42" Size : 730(W)mm X 600(D)mm X 1856(H)mm

▶ 46" Size : 780(W)mm X 600(D)mm X 1896(H)mm

MODEL KD98

KD98 model is made of a standardized 2.0mm CR-steel material and liquid-coated that shows excellent gloss. It is a Digital Signage type KIOSK model that is stable and sophisticated, installed with stainless columns. Depending on the client's requirements, a monitor ranging from 42" to 56" can be installed.

▶ 42" Size : 940(W)mm X 540(D)mm X 1905(H)mm

MODEL KM42

KM42 is an advanced model made of a standardized 1.6mm CR-steel material, and powder-coated to improve its durability. It is designed to be noticeable as it stands out and is more aesthetic for it is attached with a bezel at the front part. Depending on the client's requirements, a LED touch panel ranging from 22" to 42" can be installed, and the inner is designed to allow installation of a slim PC requested by the client. This model can also be purchased with immediacy.

▶ 42" Size : 1115(W)mm X 720(D)mm X 1320(H)mm

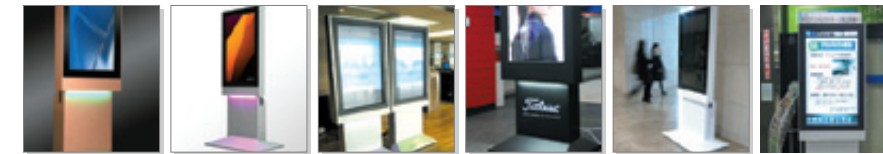

MODEL Helios

Helios model is a slim-designed, independent type KIOSK model that is made of a 1.6mm CR-steel material with its option of either powder-coating or liquid-coating. As an advanced model, it is sophisticated and elegant, and designed to be noticeable as it stands out and is more aesthetic for it is attached with a LED lamp and acryl accessories at the front part. It supports a wide range of monitor sizes and the inner is designed to fit in a slim PC.

▶ 42" Size : 960(W)mm X 601(D)mm X 1930(H)mm

▶ 46" Size : 760(W)mm X 650(D)mm X 1920(H)mm

MODEL KH32

KH32 is a slim, dynamic model that demonstrates the S-line image, designed to allow installation of 32", 42" and 46" LCD Touch Panel. A LED Ad section is attached to the lower section of a monitor to maximize advertising effects and to enhance an aesthetic element of an enclosure. The upper section of a rear part is designed considering the repair and replacement of a monitor for the purpose of easier maintenance and the lower section has a space to place a bare bone PC.

▶ 32" Size : 910(W)mm X 630(D)mm X 1303(H)mm

▶ 42" Size : 1200(W)mm X 710(D)mm X 1390(H)mm

▶ 46" Size : 1280(W)mm X 710(D)mm X 1408(H)mm

MODEL Poseidon

Poseidon is a model developed to be able to focus on the content more than Zeus, the first digital signage model, using the full HD LED panel of 55" or higher. This model is designed simply and slimly not to attract a user's eye from anything other than the content, but also designed so it can be repaired and maintained in the back-to-back manner, not in the front-door manner, to emphasize the simplicity of the product.

▶ 55" Size : 900(W)mm X 600(D)mm X 1900(H)mm

▶ 65" Size : 1100(W)mm X 600(D)mm X 2150(H)mm

▶ 70" Size : 1140(W)mm X 600(D)mm X 2250(H)mm

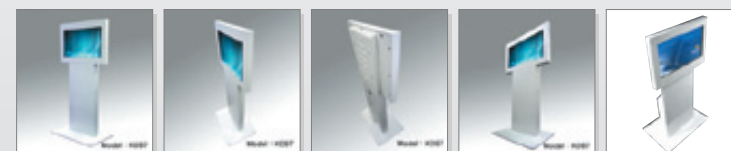

MODEL KD97

KD97 model is a slim-designed, Digital Signage type KIOSK model that is highly durable owing to liquid-coating and made of a 1.6mm CR-steel material. It is sophisticated and elegant, as well. It is designed to show its calmness and dynamics so as to attract model users, yet it sustains the transcendent design under a strategically-located environment.

▶ 32" Size : 930(W)mm X 630(D)mm X 1645(H)mm

MODEL i-STYLE

This has an ultra-slim design that emphasizes simplicity through the use of black silk printing on the front Acryl with iPhone-shaped design. This is the product that has a wide viewing angle using the 42"-46" full HD LED and that is easy to secure space having simple movement methods due to the mounting of a caster.

▶ 42" Size : 1200(W)mm X 710(D)mm X 1390(H)mm

▶ 46" Size : 1280(W)mm X 710(D)mm X 1408(H)mm

MODEL KJ-14

Digital Signage or DID (Digital Information Display) breaks with the existing analogue billboards and makes it possible to use videos and flashes as well as photos, thus being spotlighted as the next generation of advertising means because of easy change in content and low replacement costs. This can be used for path-finding, road guidance, etc. as well as advertising functions, by adding the function of touch. This can be transformed into a wall tapestry, ceiling, and openframe, in addition to stand-alone, and is used in various environments, such as department stores, airports, public institutions, shops, and offices.

▶ 55" Size : 870(W)mm X 90(D)mm X 1969(H)mm

MODEL Hermes

HERMES boasts of low power consumption and high image quality through the use of a 32-inch TFT-LED. This has a wide viewing angle and makes it possible to see clearly at any position and express interactive content look well at high reaction speeds.

HERMES has a special internal design to prevent the deterioration of performance while reducing the size, as compared with the existing models. Also, this allows for easy, simple replacement of internal devices through modularization of all parts to ensure users can address any breakdown easily, which may suddenly arise.

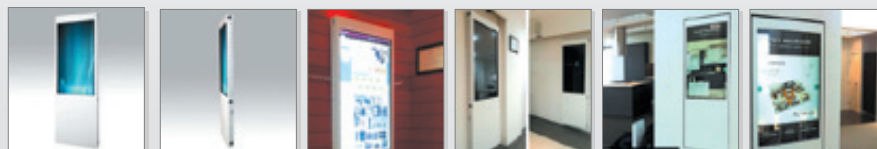

▶ 32" Size : 592(W)mm X 400(D)mm X 1730(H)mm

MODEL KWM-01

The KWM-01 model is a model to export to Canada and is designed on the basis of the wall-mounting 46" display size. It is designed simply and very slimly to be installed in various environments, and can graft various multimedia elements through the installation of a separate case at the bottom.

▶ 46" Size : 656(W)mm X 76.5(D)mm X 1885(H)mm

MODEL KW46-B

The W46-B model is the digital signage designed to allow for installation even at a confined place by making the prior model KW46-A slimmer. This produces interior design to install a barebone PC to minimize weight, and makes it possible to graft various multimedia elements by mounting a separate case on the front part.

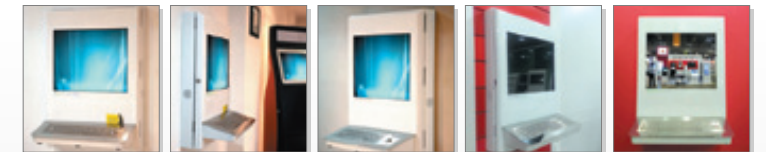

▶ 46" Size : 900(W)mm X 690(D)mm X 2100(H)mm

MODEL KWM19

The KWM-19 model is 19 inches in size and is a compact wall-mounting kiosk made to facilitate spatial arrangement. As a model exported to the UK, this model is recognized as simple, stable design and is a practical product that can be used easily in manufacturing plants, logistics warehouses, and other places through the application of the metal keyboard.

▶ 19" Size : 530(W)mm X 380(D)mm X 1450(H)mm

MODEL i-WALL

The I-wall model is wall-mounted, and has the same design as I-Style. This product consists of 32", 42", 46", and 55" in size, allowing the extensive selection of products with extensive sizes. This has simple, sophisticated design, finishes the rolled aluminum border, and uses the black silk printing with the front Acryl made as the back, so it is a product with a very excellent monitor screen note rate.

▶ 42" Size : 630(W)mm X 90(D)mm X 1035(H)mm

▶ 46" Size : 685(W)mm X 95(D)mm X 1113(H)mm

MODEL

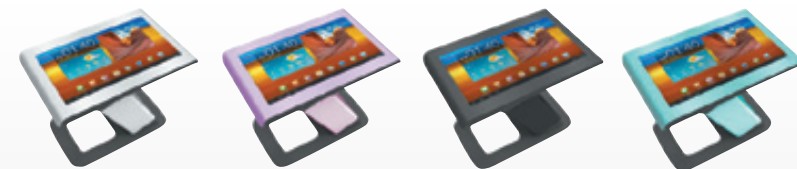

Table Kiosk- Z1

The Table Kiosk Z1 model is an evolved table that allows display, content, advertising videos, unmanned ordering system, etc. on ordinary tables. There is no risk of damage due to attachment of tempered glass to its outside, and a problem does occur to the product despite the flowing of water, beverages, etc. flow thereon. Users can install the multi-touch (10 Point) and feel a sense of freedom and non-restriction.

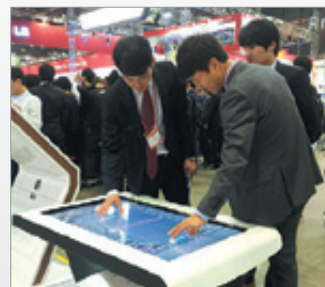

This model can be produced through changed design of the size of panel, the height of the product, etc., depending on its use, and is used in various environments, such as CEO rooms, conference rooms, exhibition halls, hospitals, shops, and restaurants.

▶ 42" Size : 1150(W)mm X 750(D)mm X 710(H)mm

- Very useful for a meeting by teams due to the mounting of tempered glass and 10-point multi-touch of the IR system
- 2-color powder coating (Making gloss brighter and protecting the product from external scratches)
- Has functionality, stability, and chic, and well-suited design at any place, due to an appropriate combination of black and white
- Make all operations simple because monitor control, power switch, volume control, USB port, dual-display terminals, etc. are exposed to the outside
- Make thin yet strong CR steel robust through the use of 1.6mm-2mm CR-Steel

MODEL

Outdoor Kiosk Surya

■ Surya, a smart-type air circulation kiosk, is released.

An outdoor kiosk 'SURYA' boasting superior performance by applying a variety of technologies has received rave reviews from overseas customers through the exhibition and launch event in the Retailtech Japan Show in Japan. Outdoor 'SURYA' realizes the function of perfect waterproof and dustproof through the use of special, dual airfilters, and adopts the constant temperature (heat/cool) and humidity system using artificial intelligence technique by detecting changes in internal temperature and humidity in real time and maintain such temperature and humidity in the best conditions.

■ Conducted a test at a company specializing in kiosk located in Osaka, Japan (Around June 2013)

- **Electrical Rating** : Operational or otherwise in Japanese power source/ Electric wiring -power noise in AC and DC lines / Leakage breaker / Power strip, etc.
- **Safety Assessment** : Inclination test on a slope of 15 degrees / Inversion test - measuring the weight of an enclosure (Case) before pulling the spring scale from all directions
- **Structural Evaluation** : Efficiency of several types of devices / Safety and maintainability of the door
- **Environmental Assessment** : Watering test / Temperature test / dustproof test at the angle of 30 degrees in every direction

▶ KC Certification products

▶ 47" Size : 900(W)mm X 264(D)mm X 2100(H)mm

■ SURYA adopts the smart-type air circulation system to minimize the environmental problems and power consumption.

■ SURYA goes through perfect tests at a constant temperature humidity chamber and maintains optimum internal temperature.

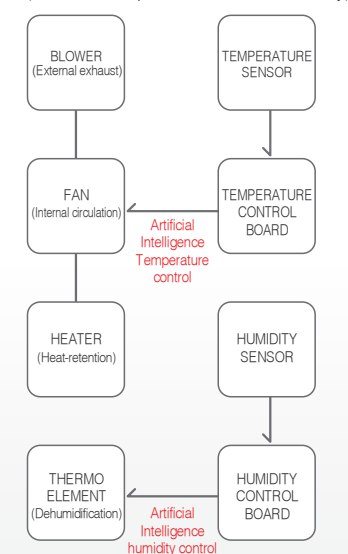

■ Our company is producing products that meet the requirements of the international standard certification of quality and environmental management systems (ISO 9001 and 14001).

■ BLOCK DIAGRAM

(Constant Temperature/ Constant Humidity)

■ Our products do not adopt the air conditioning method used by other companies.

1. The air conditioning method is often a problem in summer and has a lot of minor failure because of high wattage.
2. Condensation on the monitor surface occurs due to much difference in Indoor and outdoor temperatures, and there is a problem that temperature around the outdoor unit of the air conditioner rises.
3. Refrigerant used in air conditioning causes an environmental problem because its leak into the atmosphere depletes ozone layers.

MODEL Photo kiosk Solution

The Photo kiosk solution is a kiosk solution that makes it possible to take a commemorative photo on the spot with just a few touches on various platforms through a real-time web camera and transmit and share it via email, SNS, MMS, etc. It boasts of a 42" large touch screen, fast reaction speed, and ergonomic user interface as a major advantage.

Photo Kiosk Applications

This solution is available for various events and corporate promotions, such as event venues, new product announcements, seminars, wedding shops, college festivals, theaters, clothing stores, movie premieres, etc.

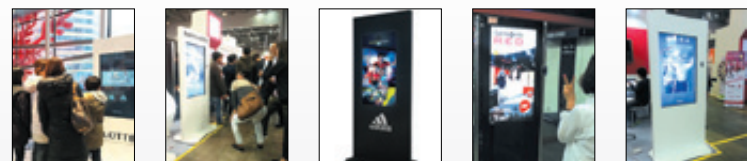

▶ 42" Size : 1200(W)mm X 710(D)mm X 1390(H)mm

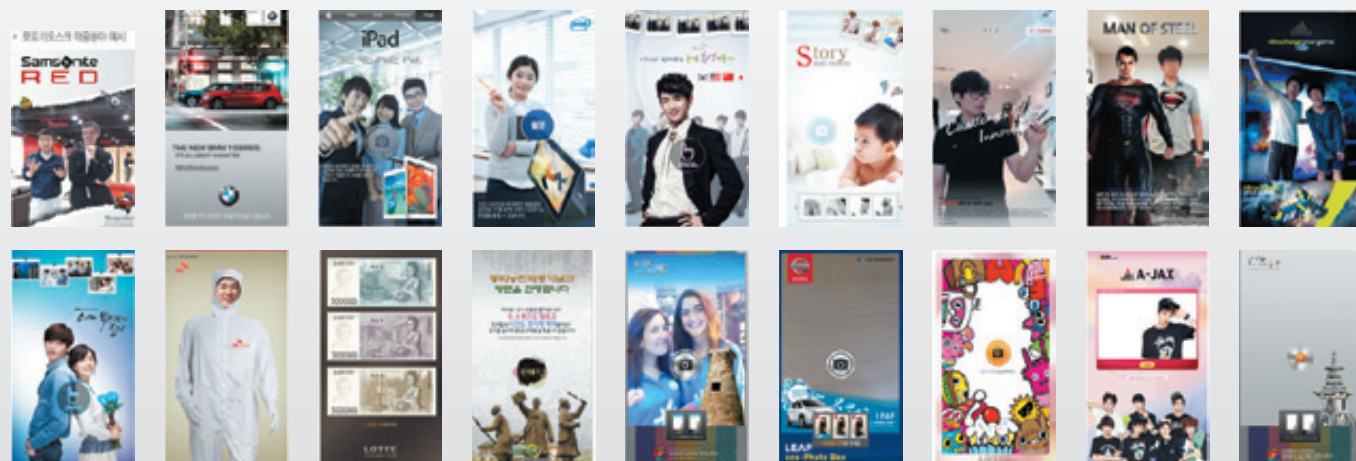

Operating System: Win XP, Win 7 / Use environment: Intel i3 processor -

Sending screen to customers at the time of transmitting photos via a smartphone

▶ Example of the installation of Photo Kiosk

▶ Example of the establishment of Photo Solution

1. Simple and intuitive interface

This allows for taking a picture with a simple touch to transmit it via MMS, e-mail, and SNS. The touch interface of the photo kiosk made to be easily operated with just a finger touch is intuitive and concise.

2. Optimized hardware

The photo kiosk solution has a camera, etc. optimized for hardware of K-KIOSK. This makes the most of the functions of various hardware, such as display, IR touch, and HD camera.

3. Joyful marketing

This allows for enjoying the exposure effect by inserting promotional texts and images in the background layout. This makes it possible to place advertising on SNS by just one sharing without paying high advertising costs. After going through a simple consent process, this can be transmitted via MMS and E-mail and used for marketing.

4. Customizing

Tailored solution that can be customized, depending on the project. Necessary functions can be added to or deleted from the solution at the request of users. It is available for guest books, as well as photo transmission and sharing

MODEL AVF1800-70

The above model whose design is innovative is a hard, durable anodized aluminum alloy, can hold up the weight of the whole 70" screen and up to 56.8kg, and is provided along with a camera tray and an accessory AV shelf.

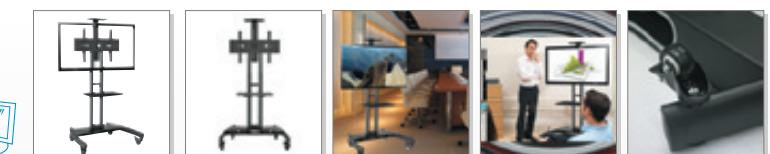

- 60"-70" flat panel TV / weight capacity : 56.7kg
- VESA compliance (200 × 200/400 × 200/300 × 300/400 × 400/600 × 400/800 × 400mm)
- Adjustment of the height of TV: 1,150mm (45") ~ 1,650mm (65")
- Color : Anodizing silver aluminum and high gloss

MODEL AVA1500-60

- Durable double-pole mobile display stand. Black powder coating complete / rolling casters (2 locking casters)
- Achievement of the maximum height of 1,530mm
- Smooth rolling casters for easy positioning (2 locking casters)
- Easy, integrated cable management in the rod / a standard height-adjustable AV shelf and a camera tray are included.
- Carrying a maximum load of 100 lbs. (45.5kg) and flat panel TV (40" to 60")
- A standard height-adjustable AV shelf and a camera tray are included.
- Your own company's package structure to save space and shipping costs much

MODEL AVA1500-50

- Color : Silver powder coating, anodizing / 4 brake casters
- Outline treatment with aluminum alloy polished very well without no sharp edges
- Carrying a maximum load of 27.3kg and Used for flat panel TV (32" to 50")
- VESA standard from 200 × 200 to 400 × 400, which is compatible with most of the current flat TV panels.
- Flexible and Easy to install with modular design and applying height-adjustable strip bar
- Can be assembled by everyone due to compact packaging

MODEL **AVF1800-100**

The TV stand for AVT1800-100 60 is the model used for 60"-100" flat panel LEDs and LCD TVs

- Easy height adjustment of the flat panel TV
- Smooth rolling (braking two wheels) Braking wheels at easy locations
- High tension steel plate and hard aluminum alloy materials
- Integrated cable management through the rod
- Carrying a maximum load of 136.4kg and holding the maximum flat panel TV (60" to 100")
- VESA standard with 200x200 to 1000x600mm, which is suitable for the largest screen on the market

MODEL **Metal Keyborad**

Korean-English metal keyboard can be installed in public PCs, industrial PCs, DID, Kiosks, etc. and consists of two types: trackball and touchpad.

Its stainless steel material not only satisfies high quality but has the function of strong waterproof, dust-proof, and anti-damage. Its smooth and flat surface allows easy removal of contaminants with a wipe with a damp cloth. In addition, it has been demonstrated through tests that the keyboard can be pressed up to 3,000,000 times, and the keyboard has enhanced durability for the use for long hours.

[Type classification] A392TB: trackball type / A392TP: touch pad type

Standard of goods : W392 × H110 × D122mm

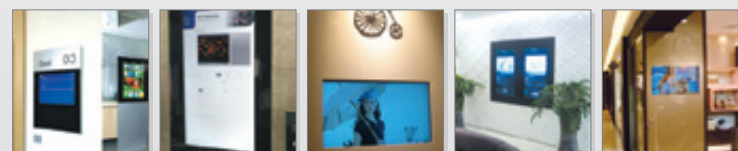

Sales by Screen Size **OPEN FRAME**

There is no front/back frame (cover) on a liquid crystal monitor with the rear side covered with a metal case. A fixed bracket shall be manufactured so that it can be installed under varying user environments when inserting the open frame to a wall or KIOSK.

- ▶ **Option** Burying the touch panel (pressure type, electrostatic capacity, ultrasonic wave and infrared ray type), AD board and high-luminance LC monitors; manufacturing the wall-mounted type DID and KIOSK; and applying to various fields such as wall display at department stores and medical institutions, movie theater sets, franchise menus and interior wall construction.
- ▶ **Manufacturer** Samsung or LG

Installation Case

K-KIOSK achieves the KIOSK values that harmonize with the surrounding along with its sophisticated designs applied to a wide range of fields and spaces.
